AUTUMN FLOWERING "L. ELIO-CATTLEYAS."

INTRODUCTION.

AGAIN, in issuing our catalogue for 1905, we beg to thank our numerous patrons for their past esteemed support.

In making the statement that this is the LARGEST and MOST COMPLETE CATALOGUE of Orchids ever offered to the public, we wish to draw attention to the fact that ours differs from the General Horticultural plant catalogue in that

EVERY PLANT DESCRIBED IS IN OUR OWN NURSERIES.

We regret that our large stock compels us to curtail descriptive matter, for the purpose of keeping the catalogue within serviceable dimensions.

All plants GUARANTEED TRUE TO NAME and description; should any customer, on receipt of Plants ordered, be in any way dissatisfied, the plants may be returned to us.

If, by accident, any plant flowers untrue to name and description, the purchase money will be refunded, with five per cent interest added, and no further claim admitted.

The paintings of several of the very choice Plants can be seen on application.

In sending order by post or telegram, it will be sufficient to quote numbers in Catalogue.

TELEGRAPHIC ADDRESS:

- 286 *Cattleya labiata* "**ALBA**," variety **GILMOURIÆ**. *See Painting*. First Class Certificate. Royal Horticultural Society. Undoubtedly the finest white *Cattleya labiata* yet seen. Flower of fine size and pleasing set; sepals and petals of the purest white. The front lobe of the lip bears a large brilliant velvety purple-blotch, surrounded by a broad, crimped, pure white margin, the tube being tinged with bright yellow. The contrast of the brilliant colour of the lip with the white sepals and petals is most effective. Strong healthy plant, 6 fine bulbs, 4 with leaves, 1 strong lead. Price on application. £ s. d.
- 287 " " "**ALBA**" variety "**LOUISE**." *See Painting*. A fine-shaped flower, sepals and petals pure white, front lobe of lip has a bright purple blotch around which is a broad white margin, the throat and tube have marks of purple. A very pleasing variety. Fine plant, 3 very strong bulbs, all leaved, 1 strong lead. Price on application.
- 288 " " "**ALBA**" variety "**PRINCESS**." *See Painting*. Flower of nice shape, sepals and petals white, with the faintest flush of rose towards their central parts, lip white with a dainty cerise suffusion and veining, throat a pleasing yellow, tube deeply suffused with rose. An attractive and promising variety. Grand plant, 4 specially fine bulbs, all leaved, 1 extra strong lead. Price on application.
- 289 " " "**ALBA**" variety "**REEDLEYENSIS**." *See Painting*. One of the most pleasing of the white section of *Cattleya labiata*. Of exquisite shape, large and well-balanced segments, sepals and petals pure white, front lobe of lip carries a pretty light cerise veining, leaving a nice white margin, the base and tube are adorned with lines and suffusions of rich orange yellow; most distinct and handsome. Magnificent plant, 6 grand bulbs, 5 with leaves, 1 splendid lead. Price on application.
- 290 " " "**EXCELLENS**." A fine-shaped richly coloured flower; deep magenta purple blotch; throat light mauve with a deep yellow blotch in the centre. Fine plant, 5 strong bulbs, all with leaves, 1 strong lead 3 3 0
- 291 " " "**FORMOSA**." A handsome variety; flowers finely formed; of excellent colour throughout, particularly the frontal blotch of the heavily frilled lip. Good plant. 7 bulbs, well leaved, 1 strong lead 4 4 0
- 292 " " "**PICTURATA**." A very pleasing variety; sepals and petals mauve; the usual deep purple blotch on the front of the lip is displaced with light purple veinings and suffusions; throat almost white. Strong plant. 10 very fine bulbs, well leaved, 1 very strong lead 3 3 0

398	F. W. WIGAN	(<i>Schilleriana</i> × <i>aurea</i>). A handsome hybrid : the former parent is shown in the shape of the flower. The influence of <i>Cattleya aurea</i> is seen in the richly coloured lip, which is veined and heavily mottled with bright crimson ; sepals and petals rosy-bronze, shaded with a faint yellowish hue. 402	IRIS	(<i>bicolor</i> × <i>aurea</i>). <i>See Painting.</i> If we were asked to decide which had proved the most attractive of our introductions of this section, we should certainly give the vote to this charming hybrid, which has secured more First-class Certificates and Awards of Merit from the Royal Horticultural Society than any plant placed before that society. The variation of colouring in the sepals and petals, from a deep greenish yellow to the darkest bronze, is most remarkable. The broad bi-lobed lips are of deep bright purple. All the varieties are pleasing. Splendid plant, 7 strong bulbs, well leaved, 1 strong lead	10	10	0

ODONTOGLOSSUM PESCATOREI.

ESTABLISHED. UNFLOWERED PLANTS.

A splendid batch of plants growing vigorously. We guarantee them an excellent type, and from the fact that Odont triumphans and other species were seen growing amongst them, we have every confidence that spotted forms and natural hybrids of the Od. excellens class will be flowered from them, and at our prices they offer a good investment.

2066	Extra fine plants, 6 to 9 very fine bulbs, 2 good leads	0	10	6
2067	Pescatorei "BEAUTY." See <i>Painting</i> . A pleasing variety; good shape; white ground suffused with rose; petals spotted with violet-purple; sepals bear heavy blotches of violet-purple; lip of fine size, white, with a central blotch of violet-purple, and occasional spots of the same colour; yellow disc. Strong plant, 4 very fine bulbs, 2 with leaves, 1 strong lead. Price on application.			
2068	"VIRGINALE." The absolute pure white form; flowers of particularly good shape and fine substance. Exceedingly rare. Small plant, 3 bulbs, 2 with leaves, making new growth

2074	PRÆNITENS. Splendid plant, 8 very strong bulbs, well leaved, 1 very strong lead and flower spike	5	5	0
2075	PRIONOPETALUM. Eastwood Park Variety. See <i>Painting</i> . This variety is immensely superior to other forms of this supposed natural hybrid: the flowers are large, of fine build and splendid substance. The yellow ground colour is most intense and the spotting more distinct, heavy, and decidedly pleasing. Grand plant, 5 specially fine bulbs, 2 with leaves, 1 strong lead

PHALÆNOPSIS SCHILLERIANA.

The finest batch of plants of this lovely species in Europe.

We beg to draw special attention to these plants, which are really a wonderful lot. They are growing with great vigour and some of the leaves are of marvellous dimensions.

At the moment of describing, some 600 strong flower spikes are in formation. Early orders will secure plants in spike where mentioned.

LATH ROLLER BLINDS (our own Manufacture). They are neat in appearance, and whilst admitting the requisite amount of light, form the most effective shading possible. Further, they afford an excellent protection against frost during the severe weather. We have supplied most of the leading Orchid establishments with these blinds, which have given every satisfaction. We have had them in use ourselves for several years and calculate that these blinds have saved us 50 per cent. in canvas shading formerly used.

1/9 per square yard Unpainted.

We shall be pleased to give further particulars on application.
